American Woman and her Political Peers.

COPYRIGHT, 1893, BY HENRIETTA BRIGGS-WALL.

Mrs. Henrietta Briggs Wall, of Kansas, planned this picture, found subjects for the photographs and exhibited it at the World's Fair, in Chicago, 1893. Small reproductions were sold, circulated from coast to coast, making many converts.

LESLIE WOMAN SUFFRAGE

171 MADISON AVE.

equal suffrage is growing rapidly in the South. These women, Mrs. W. J. Roach, Mrs. E. J. Graham and W. J. Scott, are shown selling The Woman's Journal in New Orleans. They saw the paper sold on the streets of Atlanta, and wanted to do likewise.

Clipping from New Orleans paper.

Staff of Woman's Journal, in Boston. The Journal came to New York in 1916.

Elizabeth Freeman and the "newsies" who invaded Wall Street. The press said a panic struck "the street" when they appeared.

Right; Suffrage Newsies selling The Woman's Journal.

A new type of Suffrage Newsie.

French-women deliver the mail.

ENGLISH WOMEN FILL POSITIONS VACATED BY MEN FIGHTING ABROAD.

English woman who is serving as village blacksmith shoeing horses, repairing farm implements, and doing other jobs that fall to the lot of the knight of the forge. This resourceful lady has two brothers in the British Army, one a major-farrier, the other a sergeant farrier. Her father is dead and as there is no one else to keep the fires burning she took over the shop and now can wield the hammer with strength and precision. Besides being a good horse-shoer she can repair nearly any agricultural machine used on neighboring farms.

2/5/17...

Elephants from zoo do farm-work in Surrey.

English woman "Village blacksmith!"

"WIDOWS OF FRANCE" WORKING AS PORTERS ON FRENCH RAILROADS.

French women transferring luggage at a railway station near Paris. A great deal of this sort of work is being done by women, who not only act as porters but also drive and fire the engines. They are commonly known as "widows of France". Every woman who fills these positions has released a man for some labor which aids in bringing the war to a speedier and victorious termination.

(C) Underwood and Underwood

FRENCH MUNITION WORKERS FILLING SHRAPNEL SHELLS

WOMEN REPLACING MEN IN AMMUNITION FACTORIES OF FRANCE.

One of the most important industries of the countries now at war, is the manufacture of ammunition for the men at the front. The women have taken an active part in all the occupations left vacant by the men who went to the aid of their country, but have been especially active in the munition factories. They are working hard in the new plants, set up for making the messengers of death. The accompanying photograph is but a common scene in France. The women are seen filling the shells with shrapnel in one of the factories at Chamend. 8/31/15

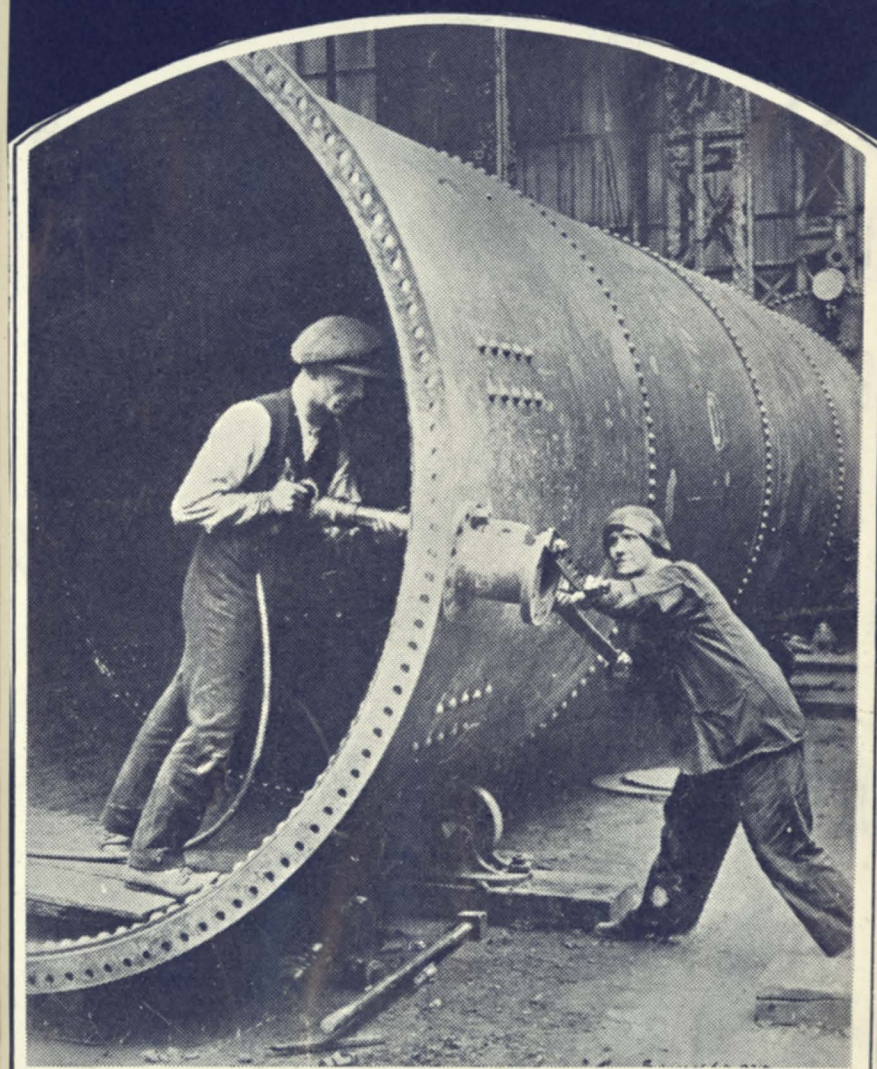

FRENCH WOMEN WORK AS ENGINEERS AND FIREMEN ON FRENCH RAILROADS.

Photograph taken at a round-house station near Paris. The three women shown in the picture do the actual work of engineers and firemen.

The "widows of France" are doing more than their share in the nation's battle for victory. They fill all sorts of positions but are especially numerous on the railroad's of the country.

7/21/17

TOGETHER THEY LABOR --SHOULDER TO SHOULDER. WOMEN AID MEN IN BRITISH INDUSTRIES.

Two types of boiler makers ---the old and the new.

As a rule boiler makers are not considered ladylike but this plucky woman has thrown tradition to the winds entering on a career in a boiler factory in Glasgow.

Clad in working togs deserted by a huskier boiler maker when the call to the colors sent him to the front, she is shown in this picture working a Hydraulic riveter, assisted by a man.

Numerous other arguments for votes for women are presented in this boiler factory in Glasgow where women are working as stokers, drillers, riveters and planers. 11-11-16

convents where the women of Russia are caring for
orphans who have lost their parents in the war.

ENGLISHWOMEN PROVE CAPABLE RAILROADERS.

Cleaning a big railroad engine in an English yard. In many of the yards and round-houses women have taken the place of men who have gone to fight the Germans. They have proved capable and efficient workers! Many other positions besides that of cleaner are filled by women. They hold jobs as watch women, flag women, oilers, track inspectors, and guards.

5/14/17...

NO TASK TOO DIFFICULT FOR ENGLISH LASSIES WHO WORK FOR COUNTRY.

Wheeling wheelbarrows filled with earth may be a back-bending task, generally not attributed to women, but nevertheless, Great Britain's lassies have taken it upon their shoulders to do even that task. Photo shows them wheeling away earth excavated for the installation of hydraulic pumps. Official photo.
